Friday, May 11, 2012

Our Week In Review: This week, we learned all about fish. We learned that fish breathe with gills, are cold-blooded, are vertebrates, have fins, live in fresh or salt water, and hatch from eggs.

In math, our class created picto, bar, and circle graphs each day and discussed our data. Students also collected data from their classmates and transferred that data into bar

graphs! They had to include a title, a scale, labels, and bars on the graph all by themselves! Then, they had to tell me four things about the graph! Wow, they did a great job! We also continued our daily weather journal and graphed the changes in temperature too! We wrote in our writing journals each day.

"Read & Feed" Special Day: Our class is going to celebrate how far we've come this year in reading!!! On Friday, each student can bring 3 small snacks and a drink to class. In the morning, we'll do book shares, and in the afternoon we'll read books and magazines with flashlights! Please look for the note on book share guidelines and more information on this special day!

Used Book Fair: Starting Monday, each child may bring up to 3 gently used books from home. On May 21, each class visits the library to pick out "New to Me" books to take home for summer reading! What a good deal!

Field Day: Monday, May 21 is Wanamaker Field Day. Our first grade lunch is at 11:00 AM this year. Reservations and prepayment are required in the office ASAP for the hot dog sack lunch. We are looking for parent volunteers to help with an AM shift, PM shift, or both shifts. If you can help, please contact Mrs. Weil.

School Supply Packs: You can pre-order your child's 2012-2013 school supplies by completing the order form in the Mustang News or going online at www.wespto.net. Packs will be ready for pick up at enrollment. Order forms and payment are due by May 25th.

Don't Forget!
Every Thursday is
Wanamaker Day!
Wear your red and
black!

Sneak Peak for the week of May 14-18

Reading: Book share due Friday!

Science: We'll wrap up our animal unit & continue our daily weather journals & line graphs. We'll learn all about precipitation, clouds, and wind this week.

Math: We'll learn about probability and decide if chances are certain, impossible, or possible using spinners and drawing cubes out of bags.

Writing: We'll continue our daily writing journals.

Thanks for collecting all the pop-tops for the Ronald McDonald House this year!

Birthdays

June 1-Walker

July 9-Amir

July 18-Mandy

July 20-Natalie

Calendar

May 18: First Grade "Read & Feed"

May 21: Field Day

May 23: Talent Show
