While we realize there is no substitute for actually lacing up the boots, hitting the trail, smelling the wilds of nature, and working up a

sweat to reach your final destination, eHikes (electronic hikes) is a tool that will not only assist you in trip planning, but will hopefully help you reconnect and relive your experiences in Glacier National Park. We also recognize that not everyone is able to reach different destinations in the park, so this provides those individuals with the opportunity to see, and maybe imagine, what a trip into Glacier's wilderness is like.
