

→ To place the decimal in the product, count the number of places in the problem, and have the same amount of decimal places in the answer.

$$12.2 \times 3.4 = 36$$

$$\begin{array}{r} 12.2 \\ \times 3.4 \\ \hline 488 \\ + 3660 \\ \hline 41.48 \end{array}$$

$$3.9 \times 0.7 = \text{less than } 4$$

$$\begin{array}{r} 3.9 \\ \times 0.7 \\ \hline 2.73 \end{array}$$

$$0.02 \times 12.95 = \text{less than } 12$$

$$\begin{array}{r} 12.95 \\ \times .02 \\ \hline .2590 \end{array}$$

$$124 \times 2.6 = \text{at least } 250$$

$$\begin{array}{r} 124 \\ \times 2.6 \\ \hline 744 \\ + 2480 \\ \hline 322.4 \end{array}$$
